

PHASE THEORY

Full Extended Corpus

Canonical Index — 91 Papers across 11 Tiers

TIER I — CORE CANON

- 0. Phase Theory: Scope, Intent, and Replacement Claim
- 1. The Axioms of Phase Theory
- 2. Phase Admissibility and the Global Consistency Functional
- 3. Emergence of Discreteness from Phase Topology
- 4. The Photon Non-Paradox Theorem
- 5. Probability Without Randomness
- 6. Measurement Without Collapse
- 7. Particle Ontology from Stable Phase Defects
- 8. Phase Thermodynamics
- 9. The Elimination of Fields
- 10. Emergence of Spacetime from Phase Order
- 11. Phase Cooling and Thermal Interfaces
- 12. Phase Information Theory
- 13. Black Holes and Phase Saturation
- 14. Phase Cosmology
- 15. Ultimate Phase Limits
- 16. Reduction of QM, QFT, and GR to Phase Theory

- 17. What Phase Theory Does Not Claim
- 18. Falsifiability and Experimental Frontiers
- 19. The Phase Canon: Closure and Open Problems

TIER II — AXIOMATICS, RIGOR, & MATHEMATICAL STRUCTURE

- 20. Independence and Minimality of the Phase Axioms
- 21. Alternative Equivalent Axiom Systems for Phase Theory
- 22. Mathematical Structure of the Phase Configuration Space
- 23. Topology of Admissible Phase Manifolds
- 24. Functional Analysis of the Admissibility Functional
- 25. Stability Theorems for Phase Defects
- 26. Symmetry, Invariance, and Redundancy in Phase Descriptions

TIER III — QUANTUM RECONSTRUCTION

- 27. Phase-Primary Quantum Theory (PPQT): Formal Construction
 - 28. Recovery of Schrödinger Dynamics as an Effective Limit
 - 29. Path Integrals as Phase-Admissible Summaries
 - 30. Entanglement as Global Phase Constraint
 - 31. Nonlocality Without Signaling in Phase Theory
 - 32. Bell Inequalities Revisited Under Phase Admissibility
 - 33. Contextuality as Structural Phase Dependence
 - 34. Quantum Zeno Effect Without Measurement Postulates
-

TIER IV — PARTICLES, FIELDS, & INTERACTIONS

- **35.** Classification of Phase Defects and Particle Families
- **36.** Charge Quantization from Phase Winding
- **37.** Spin, Statistics, and Phase Holonomy
- **38.** Mass Hierarchies from Admissibility Depth
- **39.** Bosons as Collective Phase Modes
- **40.** Fermions as Protected Topological Defects
- **41.** Interaction Vertices as Phase Reconfiguration Events
- **42.** Effective Force Laws from Phase Geometry

TIER V — SPACETIME, GRAVITY, & EXTREME REGIMES

- **43.** Lorentz Invariance as Emergent Phase Symmetry
- **44.** Metric Geometry from Phase Gradient Structure
- **45.** Gravitational Lensing as Phase Refraction
- **46.** Equivalence Principle from Phase Universality
- **47.** Singularities as Phase Saturation Boundaries
- **48.** Black Hole Thermodynamics from Phase Entropy
- **49.** Hawking Radiation Without Fields
- **50.** Information Retention in Phase-Saturated Objects

TIER VI — COSMOLOGY & LARGE-SCALE STRUCTURE

- **51.** Origin Without Singularity: Phase Genesis
- **52.** Inflation as Phase Synchronization
- **53.** Dark Energy as Global Phase Pressure

- 54. Dark Matter as Phase-Silent Structure
- 55. Structure Formation from Phase Defect Seeding
- 56. Cosmic Time as Phase Ordering
- 57. Heat Death Reinterpreted as Phase Equilibration

TIER VII — INFORMATION, COMPUTATION, & CONTROL

- 58. Information as Phase Distinguishability
- 59. Phase Entropy and Information Bounds
- 60. No-Cloning as Phase Coherence Constraint
- 61. Phase Logic Beyond Boolean and Quantum
- 62. Virtual Qubits as Phase Attractors
- 63. STIRAP and Phase-Native Computation
- 64. Phase Error Correction via Coherence Locking
- 65. Limits of Computation from Phase Saturation

TIER VIII — ENGINEERING, MATERIALS, & DEVICES

- 66. Phase Power Generation Principles
- 67. Phase Buffers and Energy Storage
- 68. Phase Capacitors and Non-Thermal Energy Routing
- 69. Phase Cooling Architectures
- 70. Phase Thermal Interface (PTI) Standards
- 71. Phase Metamaterials and Structured Admissibility
- 72. Self-Conjugate Topological Phase Modes in Photonic Media
- 73. Non-Hermitian Phase Media

- 74. Room-Temperature Coherence Systems

TIER IX — EXPERIMENTAL PROPOSALS & TESTS

- 75. Experimental Signatures of Phase Cooling
- 76. Deviations from QFT at Extreme Coherence
- 77. Phase-Based Tests of Quantum Randomness
- 78. Tabletop Tests of Non-Collapse Measurement
- 79. Photonic Tests of the Photon Non-Paradox
- 80. Phase-Admissibility Violations as New Physics Signals

TIER X — META-THEORY, PHILOSOPHY, & CLOSURE

- 81. Ontology of Phase: Why Φ Is Primitive
- 82. Comparison with Relational, Information, and Process Realism
- 83. Why String Theory Is Unnecessary
- 84. Why Many-Worlds Dissolves Under Phase Theory
- 85. Limits of Reductionism and Emergence in Phase Theory
- 86. Consciousness as Phase Resonance
- 87. Open Problems and Unresolved Phase Regimes

TIER XI — FINAL SEALS

- 88. Complete Internal Consistency Proof of Phase Theory
 - 89. Why Reality Is Stable: Ultimate Phase Constraints
 - 90. Phase Theory and the End of Fundamental Paradoxes
-

CORPUS STATUS

91 papers. 11 tiers. One framework.
